textures, the apparatus having an input to receive data identifying

one of the set of [standardised] standardized textures, and means

for processing the data to generate output texels of the identified

texture[; characterised in that] , wherein each texture of the

[standardised] standardized set is a procedural texture, the input

identifying data comprises one or a sequence of program commands,

the execution of which will result in the generation of a

respective procedural texture, with the means for processing data

comprising a processor operable to implement all such input program

commands or sequences of input [programme] program commands as

required to generate the procedural textures of the [standardised]

standardized set.

Claim 4, line 3,   change "programme" to --program--;

         line 4,   change "standardised" to --standardized--.

Claim 11, line 3,   change "same" to --program commands--.

IN THE ABSTRACT

Page 16, before line 5, delete in its entirety and substitute the

         following heading: --ABSTRACT OF THE DISCLOSURE--;

         line 5,   delete "(34)";

         line 6,   change "standardised" to --standardized--;
